NIKA MODEBADZE

FRONT-END DEVELOPER / AI-POWERED FULL-STACK DEVELOPMENT

Tbilisi, Georgia • +995 579 28 48 89 • nika.modebadze.1@btu.edu.ge

PROFILE

Front-end developer with hands-on experience building responsive websites and React interfaces. I work with HTML, CSS, JavaScript and Figma, and use AI coding tools to develop full-stack features, troubleshoot issues and speed up delivery. My background also includes QA testing, SQL and network administration.

TECHNICAL SKILLS

Frontend JavaScript, TypeScript, React, Next.js, HTML5, CSS3, SCSS, Bootstrap

Backend & data Node.js, Python, Django, Supabase, SQL, REST APIs, JSON

AI development OpenAI Codex, Cursor AI, Claude Code, AI-assisted development workflows

Interface & motion Figma, GSAP, responsive UI, DOM manipulation, cross-browser compatibility

Development tools Git, GitHub, Vite, npm, browser debugging, web deployment, functional testing

EXPERIENCE

AI-Powered Full-Stack Developer | Agency • May 2026 – Oct 2026 • On-site

- Built responsive front-end pages and connected application features to backend services.
- Used Cursor and Codex for implementation, code review, debugging and iteration; refined UI interactions with GSAP.

Front-End Developer | Self-employed • Mar 2024 – May 2026 • Remote

- Translated Figma layouts into working interfaces with HTML, CSS, JavaScript and React.
- Maintained responsive layouts, worked with Git and GitHub, and addressed browser and usability issues.

SELECTED PROJECTS

GeoExchange | Currency exchange website

Built an interface for viewing exchange rates and converting values between currencies.

Trading Journal | Trading activity tracker

Created a web interface for recording trades and reviewing trading history.

Crypto Swap Interface | Web application

Developed an interactive token-swap interface with currency selection and responsive form states.

Digital Agency Website | Business website

Created a responsive agency website with service pages, interactive sections and GSAP animation.
